

## ACC AssetSage SB™ Small Business Inventory Automation Solution Package

The AssetSage™ SB package provides everything a small business needs to automate the inventory process using either RFID or barcode technology.

- Reduce inventory counting time by hours
- Eliminate data entry errors
- Reduces paperwork
- Allows employees to focus on other tasks
- Creates audit trail
- Allows inventory count to be taken more frequently
- Reduces stockouts
- Reduces shrinkage

### Complete Package Includes:

- **DataGun** (RFID and barcode handheld reader)
  - o Includes cradle with USB cable, power supply, and stylus
  - o Includes HyperSage™ Mobile RFID middleware
- **AssetSage™-Lite Software** (hosted on handheld device)
  - o 3 modes of operation
    - 1) Receive Mode – increases inventory
    - 2) Deploy Mode – decreases inventory
    - 3) Audit Mode – compares scanned items to expected items and generates exception report
  - o Access reports directly on the handheld or transferred to your PC using USB docking cradle or WiFi. Report types include:
    - 1) Assets expected and found during Audit Mode
    - 2) Assets expected and missing during Audit Mode
    - 3) In-Stock/Out-of-Stock Assets
